

The Royal Society of Biology's Accreditation Programme is an independent and rigorous assessment of bioscience degrees in the UK. It supports the advancement of skills and education in the biosciences.

The process is supported by a strong network of volunteers and is overseen by the Accreditation Committee, without whom the programme would not be the success it is today.

672

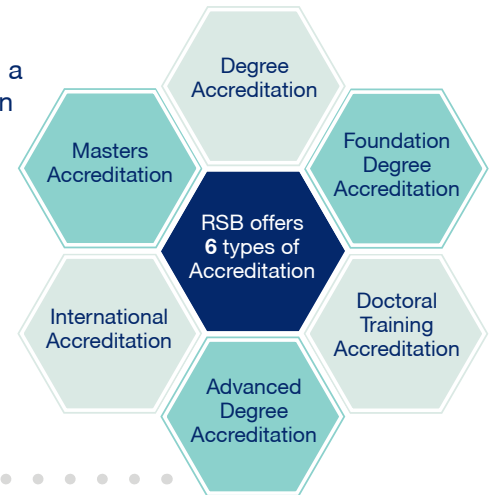

Programmes that have been awarded a type of accreditation

£1.1m

UK Commission for Employment and Skills grant

Over 50%

Of UK institutions have been awarded Accreditation since launching in 2012

Accreditation impact and assessment
